## Skills

**Languages:** Javascript, C/C++, TypeScript, PHP, HTML/CSS

**Frameworks:** ReactJs, NextJs, NodeJs, NestJs, ExpressJs, Tailwind CSS, MUI

**Tools:** GIT, GitHub, VS-Code, Postman, Firebase

**Database :** MongoDB, MySQL

## Work Experience

**Better Online Ltd, Israel**

Sep 2023 - Present

**Software Engineer (Full Stack) - Remote**

- Built a high-performance ReactJS chatbot UI for Lenny.ai (98% uptime) for seamless integration and intuitive user experience, providing effortless access to critical information.
- Optimized checkout process for Lenny.ai premium services by integrating diverse payment gateways (PayPal, Paddle), leading to a 15% increase in conversion rates and a 20% boost in customer satisfaction.
- Built scalable NestJS REST APIs for Lenny.ai (concurrent users) for efficient backend communication & real-time updates (enhanced responsiveness).
- Boosted Lenny.ai development efficiency (25%) & data analysis with scalable UI components & dashboards.
- As part of the Lenny.ai team, I contributed significantly to develop this platform and various other platforms related to lenny like business.lenny.ai and other.

**Welkin Ring Digital Solutions, Faridabad**

Apr 2022 - Apr 2023

**Javascript Developer (MERN)**

- Developed a 20% faster event registration web app for the Rotary Club with user-friendly features (front-end validation, SMS/email notifications).
- Developed secure & scalable client web app with HDFC integration and robust validation for seamless transactions & data accuracy (MySQL).
- Developed interactive social media sliders leveraging Facebook Graph API and YouTube Data API to curate and display engaging content on our websites.

## Education

**Gurugram University**

Sep 2023 - Pursuing

Masters of Computer Applications

Relevant Coursework: Object Oriented Programming, Databases, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Artificial Intelligence, Networking, C/C++, Java

**Maharshi Dayanand University, Rohtak**

Aug 2019 - Jun 2022

Bachelors of Computer Applications

Relevant Coursework: Operating Systems, Data Structures, Artificial Intelligence, Networking, Databases, Software Engineering, OOPs, E-Commerce, Digital Electronics, C/C++, Java

## Project Work

- **Full-Stack Blogging Application - Node.js, EJS, and MongoDB (Link):** Built a full-stack blogging application (Node.js, EJS, MongoDB) offering CRUD (Create, Read, Update, Delete) functionalities for blogs, secure user authentication (signup, login, logout, password reset with bcryptjs hashing), and file upload capabilities using multer middleware.
- **Ecommerce Store - ReactJS (Link):** Developed an e-commerce store in reactjs with feature like product filtering (category, company, price), user cart (persistence via local storage), secure login (Google/GitHub auth), routing (Browser-Router), state management (Context API, useReducer). Hosted on Netlify.
- **NewsMaster - ReactJS (Link) :** Developed NewsMaster, a real-time news website using React.js, which fetches and displays news from the News API in various categories. Implemented advanced features such as a top loading bar, spinner, and infinite loader to enhance user experience. Utilized HTML, CSS, JavaScript, React.js, and React Router for robust front-end development.
