## EDUCATION

### Post - Graduation (MCA)

Gurugram University

06/2023 - Present

Courses

- Master of Computer Applications (MCA) 1st Yr.

### Graduation (BCA)

Maharshi Dayanand University

05/2019 - 09/2022

Courses

- Bachelor Of Computer Applications (BCA)

## PROJECTS

### Web Application Development

Registration Form

Rotary Club Delhi South West

Achievements/Tasks

- Created a comprehensive web application for the Rotary Club Delhi South West, facilitating a painting competition.
- Designed a registration form for enrollment, complete with front-end validations such as age calculation based on date of birth and category allocation as per age group.
- Incorporated an SMS and Email system to notify users upon successful registration.
- Ensured efficient data storage by saving all registration information into a MySQL database.
- Leveraged multiple technologies for development, including PHP, JavaScript, HTML, CSS, Bootstrap, SMTP Mailer, and an SMS Gateway.

### Payment Gateway Integration

Web App

Presude Lifesciences

Achievements/Tasks

- Successfully integrated HDFC bank's payment gateway into the application, providing a secure and efficient platform for financial transactions.
- Implemented comprehensive validation checks and managed data storage effectively using MySQL.
- Utilized a diverse set of technologies including PHP, JavaScript, HTML, CSS, and Bootstrap for front-end and back-end development.

GIT

## PERSONAL PROJECTS

### Ecommerce Store (Web App)

- Developed an e-commerce application named "Meri Dukan" using React.js, which includes features like product filtering by category, company name, and price.
- Implemented a cart system where users can add products, check the total price, and all cart details are saved in local storage for persistence.
- Utilized BrowserRouter for routing and BrowserAuth for login authentication via Google or GitHub.
- Hosted the application on Netlify for easy access and better user experience.
- Used modern React features and hooks such as Context API and useReducer Hook for state management.
- <https://meri-dukan-react-ecommerce.netlify.app/>

### NEWS APP (Web app)

- Developed a real-time news website named "NewsMaster" using React.js, which fetches data from the News API according to different categories of news provided.
- Implemented features like a top loading bar, spinner, and infinite loader for an enhanced user experience.
- Utilized React Router for efficient routing and navigation within the application.
