EDUCATION

Post - Graduation (MCA)
Gurugram University

06/2023 - Present

Courses
- Master of Computer Applications (MCA) 1st Yr.

Graduation (BCA)
Maharshi Dayanand University

05/2019 - 09/2022

Courses
- Bachelor Of Computer Applications (BCA)

PROJECTS

Web Application Development
Registration Form

Rotary Club Delhi South West

Achievements/Tasks
- Created a comprehensive web application for the Rotary Club Delhi South West, facilitating a painting competition.
- Designed a registration form for enrollment, complete with front-end validations such as age calculation based on date of birth and category allocation as per age group.
- Incorporated an SMS and Email system to notify users upon successful registration.
- Ensured efficient data storage by saving all registration information into a MySQL database.
- Leveraged multiple technologies for development, including PHP, JavaScript, HTML, CSS, Bootstrap, SMTP Mailer, and an SMS Gateway.

Payment Gateway Integration
Web App

Presude Lifesciences

Achievements/Tasks
- Successfully integrated HDFC bank's payment gateway into the application, providing a secure and efficient platform for financial transactions.
- Implemented comprehensive validation checks and managed data storage effectively using MySQL.
- Utilized a diverse set of technologies including PHP, JavaScript, HTML, CSS, and Bootstrap for front-end and back-end development.

PERSONAL PROJECTS

Ecommerce Store (ReactJS)
- Developed an e-commerce application named "Meri Dukan" using React.js, which includes features like product filtering by category, company name, and price.
- Implemented a cart system where users can add products, check the total price, and all cart details are saved in local storage for persistence.
- Utilized BrowserRouter for routing and BrowserAuth for login authentication via Google or GitHub.
- Hosted the application on Netlify for easy access and better user experience.
- Used modern React features and hooks such as Context API and useReducer Hook for state management.

Full-Stack Blogging Application with Node.js, EJS, and MongoDB
- **Blog Management**: Enabled users to create, read, edit, and delete blogs, providing full control over their content.
- **User Authentication**: Integrated signup, login, and logout functionalities along with a forgotten password feature for password reset. Incorporated bcryptjs for password hashing to ensure data security.
- **File Handling** : Utilized multer middleware for handling multipart/form-data for file uploading.
